

## Compressed Bamboo flooring

### Care instructions

As a home owner, builder, interior designer or architect we understand you want to work with a reliable company that offers not only a solid product base and great price, but also comprehensive warranties, technical and installation support, manufacturing information and thorough product testing.

Plantation is a leader in the field of bamboo building products and is here to assist you with information and support throughout the design and building process.

In regards to cleaning and care for your new bamboo floor, Plantation recommends you look after it in the same manner you would a regular timber hardwood floor. It is a good idea to clean using a micro-fibre mop such as Bona Wood Floor Spray Mop.

### What to do to care for your bamboo floor

- Vacuum or sweep the floor regularly
- Remove spills promptly
- Placemats at exterior doors to traps and and grit from incoming traffic
- Install padded felt on feet of furniture
- When moving heavy furniture or appliances, always pick up the furniture rather than sliding it across the floor
- Keep pets claws properly trimmed to avoid excess scratches and gouges

#### Cleaning of your bamboo floor

- Use a clean static mop/micro-fibre to sweep up dust
- Use undiluted methylated spirits to remove any stubborn stains (red wine, coffee etc)

- Use diluted methylated spirits or Briwax to remove any light marks or scrapes
- Plantation suggests putting your cleaning products into a spray bottle so that you can control the amount you use. We recommend the Bona floor cleaning products, which accompanies the Bona wood floor spray mop

### What NOT to do with your bamboo floor

- Do not let sand, dirt or grit build up
- Do not use a wet mop or abrasive pads to clean/scrub floor
- Do not roll or slide heavy furniture or appliances across your floor
- When vacuuming the floor, never use the solid head direct onto the floor. Always use the brush head on the flooring
